

Training for Industry

The STA provides independent and impartial training to meet the needs of the members on a variety of topics related to emission monitoring.

A requirement of the OMA scheme is for process operators to carry out periodic auditing of stack-emission monitoring. On-site auditing refers specifically to checking that the personnel carrying out monitoring do so in accordance with the agreed site-specific protocol (SSP) and documented procedures. The aim of this one day training course is to provide a basic understanding of stack-emission monitoring to enable process operators, regulators and

Course Content

- Ethical requirements for independence and environmental awareness
- Use of MCERTS certified personnel
- Selection of appropriate methods following international standards
- Method Implementation Documents
- Estimation of measurement uncertainty
- Use of appropriate equipment
- Description of standard reference methods
- Planning of a sampling measurement campaign: site review; risk assessment; site-specific protocol
- Reporting of results
- Participation in proficiency-testing schemes.

Course duration One day online course starting at 9.30am via Microsoft Teams.

This course is aimed primarily at process operators, regulators and environmental consultants.

As the STA is a non-profit making organisation and therefore all courses are run at cost to the membership. Costs and dates of training courses are available from <http://www.s-t-a.org/training>.
